

# Drinks Selection

If there is a Scottish product available to us that is equivalent to the market leader then we choose to support our fellow Scottish businesses.

Scotland is awash with fantastic artisan food producers and we love finding, sampling and then showcasing the best produce that Scotland has to offer.

Our drink selection is no different. With a long history of brewing and distilling the selection of Scottish made drinks is constantly growing and evolving. Everything from real lemonades to rum is being produced all over Scotland by people passionate about their products.

In recent years an explosion of new companies has led to a rapid growth in terms of style and range of drinks that are now being made. Innovation and experimentation are leading to new and exciting products being launched almost on a weekly basis.

It is no longer just Whisky that Scotland is recognised for. Over 70% of all Gin produced in the UK is now made in Scotland, add to that the Scottish Vodkas, Rums, Tequilas, Beers, Liqueurs, Soft Drinks & Tonics and as you will see it is possible to fully stock a bar with just Scottish produce.

One exception is our wine list. Scotland does produce some very good quality fruit wines but we have chosen to offer a selection of wines from around the world many of them from vineyards that Scott & Steph have visited on their travels or from producers that we have met at tastings and trade fairs.

There may be some drink categories that we do not stock due to our size and location, please ask and we will be happy to recommend an alternative.

# Cocktails

The following cocktail list showcases some of our favourite Scottish products. Fresh juniper balanced with sweet orange and lemon, hints of coriander, gentle herbs and spices, with a luxurious, creamy mouth-feel and a hint of sweet malt.

## **Lussa**

**Port of Leith Distillery, Leith, 44.0%**

**£6.50**

Born in Edinburgh in 1716, James Lind is a relatively unsung hero, by 1747 he had become Surgeon of a ship called HMS Salisbury. It was on this vessel that he conducted what is recognised today as one of the first clinical trials ever recorded. Lind selected twelve sailors on the Salisbury with scurvy, and allocated two men each to six different treatments for a period of fourteen days. He recorded that the 'most sudden and visible good effects' were shown by the sailors eating citrus fruits. Hence the addition of lime within this gin. To balance the powerful citrus freshness, the distillers also used pink peppercorn alongside five other botanicals (including juniper) to create the recipe.
